About us

關於我們

景順實業股份有限公司創立於西元1980年，係以脫蠟鑄造法精密鑄造零件，並取得認證註冊合格ISO 9001: 2000認證之專業化精密鑄造廠，產品包含：閥類鑄件、產業機械、氣動工具、流體設備、汽機車、船用五金、食品機械、運動器材等之零件，材質以不鏽鋼系列、碳鋼及合金鋼系列為主。

C&S Metal Products Co., Ltd was founded in 1980, precision casting parts of lost wax casting method, and qualified ISO9001:2008 certificate for professional investment casting factory. Products include: valve parts, industrial machinery, pneumatic tools, fluid control equipment, motor vehicles, marine hardware, food machinery, sports equipment, and other components. The main material series is for stainless steel, carbon steel and alloy steel.

經營理念及服務

景順公司以誠信和客製化服務經營企業，為各項產業提供高品質鑄件產品，提供客戶最滿意的服務。景順擁有最優良的機械設備及品質檢驗儀器，可製作形狀複雜、尺寸精度良好之工件，精確的測量設備以及訓練有素的技術人員確保產品品質達到最精密的工業標準。景順公司將不斷努力提供更完善與精確的鑄件產品服務。

C&S Metal Products Co., Ltd. works with honesty and creativity to develop high quality lost wax casting supplier, and finished parts for all industrial applications with high customer satisfaction and endorsement.

Professionalism always comes first. C&S Metal Products Co., Ltd. is fully equipped with processing machinery that apply with the most complex shapes for top tolerances, high standards finish, stringent testing and strict inspection, all production procedures are supported by well-trained engineers and technicians who are determined to work for the best.

C&S Metal Products Co., Ltd. will work to achieve better quality and market achievement that will make all of us prosper.

we give you the most robust quality

Production Procedures 生產程序

多樣化設計

精密鑄造製造提供接近淨形的鑄件，提供設計師和工程師可以廣泛及自由的設計及多樣的合金選擇。

Investment precision casting produces near-net-shape configurations, offering designers and engineers freedom of design in a wide range of precision casting parts. The process is capable of producing precise detail dimensional accuracy, and parts may weigh just a few ounces to many pounds.

多種合金材質選擇

適用於大部分金屬材質。

Available for most metals.

減少製作治具

接近淨形, 減少治具成本。

By offering near-net-shape configuration, fixture costs are substantially reduced or eliminated.

減少生產成本

能夠大幅節省加工成本。

Costly machining operations are reduced and often eliminated.

① **模具設計&模具製作**

AutoCAD , Solidworks, 模流分析軟體協助模具設計與製作

Moulds with services as Auto CAD, SolidWorks, Simulation Solid Cast Software.

② **射臘&組樹**

射臘及組成臘樹

Injection-moulding waxes into a metal die. Assemble the wax pattern into a tree.

③ **陶殼模&脫臘**

沾漿作業和脫臘作業

Dipping the wax object into a ceramic slurry with an overall thickness of the shell mold. The wax is removed from the shell by dewaxing furnace.

④ **澆注&切割**

調配需要的成分熔成金屬溶液並注入經預熱後的殼模中

A desired alloy is melted and brought to the required pouring temperature.

⑤ **熱處理&洗砂**

熱處理後可以改變金屬的物理和機械特性

After heat treating, the physical and mechanical properties can be changed, but without changing the product shape.

⑥ **整形&檢驗**

整型和外觀檢驗

Straightening and Appearance Inspection. We offer all kinds of casting services for lost wax process.
